DESCRIPTORS: *Cellulose, Aging, *Wood pulp, Rayon
fibers, Polymerization.

In the case of viscose method rayon, the degree-of-
polymerization distribution of the rayon is influenced
by the degree-of-polymerization distribution of the raw
material pulp, and rayon with a uniform distribution is
obtained from pulp whose degree of polymerization is
uniform. Degree-of-polymerization distribution changes
during aging of alkali cellulose were measured using
three types of samples: linter, and wood pulps for tire
